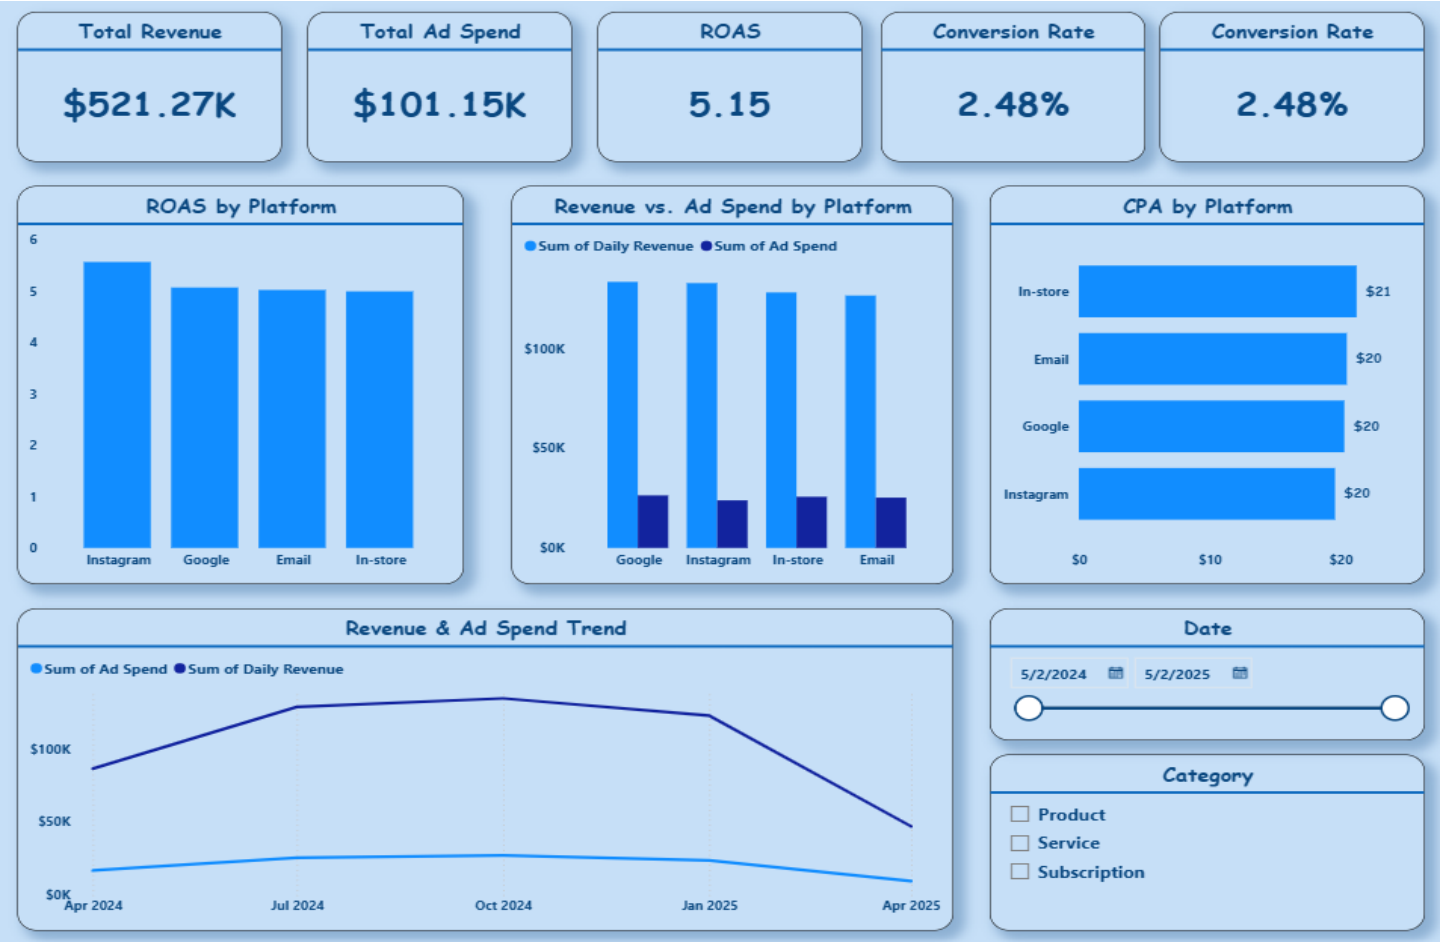
Business Performance Dashboard - HandyHome Services

- **Company Logo**: Positioned at the top to establish the HandyHome Services brand identity.
- **Interactive Navigation:** Features three primary buttons for seamless access to Marketing, Customers, and Operations dashboards.
- **Smart User Experience:** Enhanced with Hover Tooltips; when the mouse nears any button, a brief description appears to explain the page's insights.
- **Visual Icons:** Each button is paired with a representative icon (Megaphone, People, Gear) for intuitive and rapid navigation.

Marketing Insights



1. Top Key Performance Indicators (Financial Health)

- **Total Revenue ($521.27K):** Reflects the overall gross income generated, proving a strong market demand for HandyHome services.
- **Total Ad Spend ($101.15K):** The total capital allocated across marketing channels to drive customer acquisition.
- **ROAS (5.15):** A high-performance multiplier, showing that every dollar invested in advertising returns over five dollars in revenue.

- **Conversion Rate (2.48%):** Indicates the effectiveness of the marketing funnel in turning leads into confirmed service bookings.

---

2. ROAS by Platform

- **Analysis:** This chart compares the return on investment (ROI) across all channels to pinpoint the most efficient traffic source.
- **Insight:** Instagram leads the efficiency ranking with a ROAS near 6.0, outperforming Google and Email in terms of profitability per dollar spent.
- **Recommendation:** Scale up the Instagram ad budget as it currently offers the highest margin for growth.

---

3. Revenue vs. Ad Spend

- **Analysis:** A direct comparison of the investment scale versus the financial output for each specific platform.
- **Insight:** Google and Instagram are the primary revenue engines; they handle the highest volume of transactions while maintaining a healthy profit gap.
- **Recommendation:** Continue the current spending strategy on digital channels while optimizing "In-store" tactics to improve its lower revenue contribution.

---

4. CPA by Platform

- **Analysis:** Evaluates the average cost incurred to acquire one paying customer on each marketing platform.

- **Insight:** Digital channels show a highly stable acquisition cost of $20, making them more predictable and cheaper than In-store ($21).
- **Recommendation:** Reallocate a percentage of the In-store budget toward Google or Instagram to lower the overall average CPA of the business.

---

5. Revenue & Ad Spend Trend

- **Analysis:** Tracks the correlation between advertising investment and revenue growth over a 12-month period.
- **Insight:** A major revenue peak occurred between July and October 2024 without a massive increase in ad spend, suggesting high organic traction or effective seasonality.
- **Recommendation:** Audit the specific campaigns or external market factors from Q3 2024 to prepare a similar high-impact strategy for the next fiscal year.

Customer Analysis

1. Core Customer KPIs (Loyalty & Retention)

- **Total Customers (2,000):** Reflects the overall size of the active customer base acquired and managed during the reporting period.
- **New vs. Returning Balance:** Analysis shows an almost identical split between New (1,004) and Returning (996) customers.
- **Insight:** A 50% retention rate is a premium benchmark, indicating high service satisfaction and a strong level of brand trust.

- **Conversion Rate (50.20%):** A high-efficiency metric showing that half of the potential leads are successfully converted into paying clients.

2. Revenue Contribution (Donut Chart Analysis)

- **Analysis:** This chart evaluates the financial weight of each customer segment. Revenue is perfectly balanced, with Returning Customers contributing $261.0K (50.08%).
- **Insight:** The business model is highly sustainable; it doesn't over-rely on expensive new acquisitions, as existing customers generate half of the total income.
- **Recommendation:** Focus on a "VIP Loyalty Tier" to further increase the Life Time Value (LTV) of the returning segment.

3. Service Preference (Grouped Bar Analysis)

- **Analysis:** Examines service demand patterns based on customer history. "Bread" and "Dress" are the primary drivers for repeat business.
- **Insight:** Returning customers prioritize high-essential/routine services, whereas new customers show a diverse interest across all categories.
- **Recommendation:** Implement a cross-selling strategy that introduces new customers to "Bread" and "Dress" services early in their journey.

4. Acquisition & Retention Trends (Area Analysis)

- **Analysis:** Tracks the monthly flow of both customer types over a 12-month cycle to identify seasonal behaviors.

- **Insight:** Both segments peaked in October 2024, followed by a synchronized decline. This suggests that market seasonality impacts both groups equally.
- **Recommendation:** Launch an aggressive "Early Spring" promotion in April to counteract the seasonal downturn and stimulate demand.

5. Behavioral Segmentation (Interactive Slicers)

- **Analysis:** Utilizes filters for "Time of Day" and "Platform" to deep-dive into specific customer behaviors and booking habits.
- **Benefit:** Allows management to identify high-conversion windows (e.g., Afternoon vs. Night) and optimize marketing spend per platform based on real-time data.

Quality & Operations

Year	Quarter	Month	Day	Service Type	Time of Day	Sum of Daily Revenue	Sum of Ad Spend
2024	Qtr 2	May	2	Bread	Afternoon	$32.88	$39.72
2024	Qtr 2	May	3	Dress	Afternoon	$334.41	$55.42
2024	Qtr 2	May	4	Plumbing	Afternoon	$140.39	$68.74
2024	Qtr 2	May	6	Coffee	Afternoon	$42.31	$89.91
2024	Qtr 2	May	6	Plumbing	Afternoon	$202.6	$62.33
2024	Qtr 2	May	7	Bread	Afternoon	$111.32	$7.14
2024	Qtr 2	May	8	Haircut	Afternoon	$411.81	$34.77
2024	Qtr 2	May	9	Bread	Afternoon	$432.07	$24.53
2024	Qtr 2	May	10	Plumbing	Afternoon	$449.81	$74.15
Total						$521,267.84	$101,152.24

1. Top Key Performance Indicators (KPI Cards)

- **Total Appointments (2,000):** The system successfully managed 2,000 service bookings within the timeframe.
- **Average Daily Revenue ($1.43K):** A key indicator of consistent daily financial performance.
- **Unique Services Offered (5**): The business maintains a specialized portfolio of 5 core services (Plumbing, Bread, Dress, Coffee, Haircut).

- **Active Time Slots (4):** Operations are distributed across four main shifts: Morning, Afternoon, Evening, and Night.

2. Service Efficiency (Bar Chart)

- **Analysis:** Comparing revenue generated by each service type. Plumbing, Bread, and Dress are the top-tier contributors, each generating approximately $109K.
- **Insight:** There is a high level of consistency among the top three services, showing a well-balanced service demand.
- **Recommendation:** Focus on "Coffee" and "Haircut" (the lowest revenue generators) through targeted promotions to maximize their resource utilization.

3. Operational Peak Times (Pie Chart)

- **Analysis**: Shows the distribution of bookings throughout the day.
- **Insight:** The Afternoon shift is the busiest time of day (26.7% of bookings), closely followed by Morning (25.4%) and Evening (25.3%).
- **Recommendation:** Optimize technician schedules to ensure maximum availability during the Afternoon peak to prevent service delays.

4. Category Performance (100% Stacked Bar Chart)

- **Analysis:** Breaks down service categories by customer type (New vs. Returning).
- **Insight:** The split is remarkably balanced across all categories (Service, Subscription, Product), with roughly 50% engagement from both new and loyal customers.

- **Recommendation:** Since retention is high across all categories, introducing a "Subscription-only" loyalty discount could further solidify the returning customer base.

5. Operations Detail Table

- **Function:** Provides a granular, row-by-row look at every transaction, including the date, service type, time of day, and the financial balance (Revenue vs. Ad Spend).
- **Benefit:** This allows for deep-dive auditing and helps the management track individual service performance on specific days.
